## Program Overview

The course is designed to create awareness on Security Management System and how it provides a formalized, risk-driven framework for integrating security into the daily operations and culture of an Entity. The SeMS enables an Entity to identify and address security risks, threats, gaps and weaknesses in a consistent and proactive way. SeMS is not a mandated process but if an Entity has a SeMS which contains all the elements which are identified in this framework, it will help the Entity to meet the internal quality control provisions and the National / International requirements.
